

Bonis Original Models

The finest high speed sewing possible for most exclusive furs and other trades.

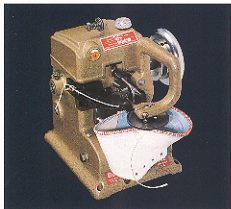

A series

A-16 - Fur machine for general repair and remodelling.

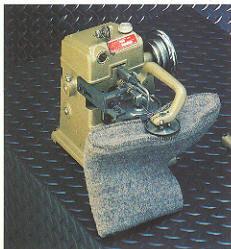

A-18 - Fur machine for let-out strips of heavier weight skins such as: let-out beaver, Alaska seal, Russian broadtail, racoon, foxes and for closing let-out mink of medium weight skins.

A-21 - Exclusively for let-out mink, ermine, chinchilla and sable.

SL series

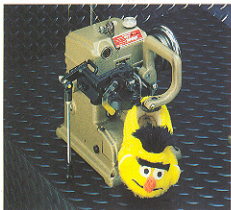

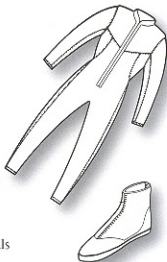

SL-64 - Machines for sewing shoes. The higher arm affords more room for the operator to handle the upper through the machines. The Bonis SL-64 inserts the draw string on shoes uppers.

ST series

ST-55 - Smaller front wheel disc allowing wheel to get into and sew around very small openings such as sewing around heels of shoes and slippers and attaching small vinyl snoots, hands and shoes to plush tops. Adaptable for all other small detail work.

ST-56 - For extra pulling power of heavy materials like wet-suits.

SP series

SP-65 - The specially designed long heavy duty needle has now been adapted for stitching the padding on slipper soles. Small front wheel permits adequate turning radius in the smallest areas. High arm allows for complete manoeuvrability of slipper, giving operator full control.
