

# Bonis Original Models

The finest high speed sewing possible for most exclusive furs and other trades.

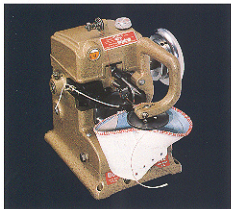

## A series

**A-16** - Fur machine for general repair and remodelling.

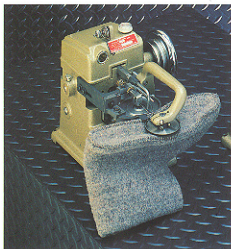

**A-18** - Fur machine for let-out strips of heavier weight skins such as: let-out beaver, Alaska seal, Russian broadtail, racoon, foxes and for closing let-out mink of medium weight skins.

**A-21** - Exclusively for let-out mink, ermine, chinchilla and sable.

## SL series

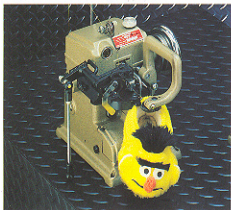

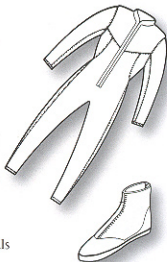

**SL-64** - Machines for sewing shoes. The higher arm affords more room for the operator to handle the upper through the machines. The Bonis SL-64 inserts the draw string on shoes uppers.

## ST series

**ST-55** - Smaller front wheel disc allowing wheel to get into and sew around very small openings such as sewing around heels of shoes and slippers and attaching small vinyl snoots, hands and shoes to plush tops. Adaptable for all other small detail work.

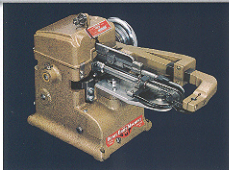

**ST-56** - For extra pulling power of heavy materials like wet-suits.

## SP series

**SP-65** - The specially designed long heavy duty needle has now been adapted for stitching the padding on slipper soles. Small front wheel permits adequate turning radius in the smallest areas. High arm allows for complete manoeuvrability of slipper, giving operator full control.

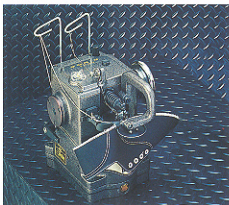

## TC series

**TC-57** - This machine is especially used for closing stuffed toys made of cloth bodies and high pile plush. The extra long arm allows large toys to get under the feed wheel.

**TC-56** - For extra pulling power of heavy materials.

## 3000 Series

- New fully automatic lubrication system
- New simpler adjustment controls
- New simpler push button for stitch indication
- New simpler threading

model	nr. of needles	needle system	recommended needle size	stitch length	seam height	teeth per inch	wheel thickness	max. speed*
A-16	1	292	12-A or 14-A or 16-A	10-26	1/16"	32	1/8"	3000
